

STOP IT® CASE HISTORIES – WATER, WASTEWATER & IRRIGATION

- 1.) **City of Tampa, Advanced Water Treatment Plant – Tampa, FL:** STOP IT® has been used on steel, black iron, copper, and PVC pipes ranging from 1” to 4” in dia. and carrying water, air, and polymer. Operating pressures were between 40 and 100 psi.

Quote: “I’ve been using your product for several years now on a variety of jobs, with great success. This product is great for quick fix, and emergency repairs. It’s worked on air leaks, water, chemicals and different types of piping and sizes. Great product - thanks”.

- 2.) **Contec Projects – Winnipeg, MB:** Used STOP IT® to repair a potable water leak on a 4” polyethylene flanged fusion joint. The operating pressure was 60 psi. They used five rolls of 4” x 12’ STOP IT®.

Quote: “Excellent product”.

- 3.) **Cox Construction – Winnipeg, MB:** Used STOP IT® to repair a cracked sewer saun. The bulb had cracked on a 1 ½” saun, they used one roll of 2” x 4’ STOP IT® to fix it.

Quote: “The new saun was worth \$450.00. Your STOP IT® saved me approximately \$425.00 – excellent product”.

- 4.) **Mobile Airport Authority – Mobile, AL:** Used STOP IT® to repair leaks in their fiberglass and PVC water mains. The dia. was 1 ½” and 2”, and the operating pressure was 80 psi.

Quote: “Fastest, neatest repair job ever. Minimum downtime, maximum strength”.

- 5.) **Beard Mechanical – Mesquite, TX:** Used STOP IT® to repair an industrial wastewater leak in a polyethylene line. The dia. was 8”. The operating pressure was 70 psi, and the temperature was 80 to 100°F. They used six rolls of 4” x 12’ STOP IT® to fix the leak

Quote: “This appears to be a miracle product, a quick fix until you can do a permanent job”.

- 6.) **City of LaPorte, TX – LaPorte, TX:** Used STOP IT® to repair a PVC irrigation main at the city golf course. The dia. was 3” and the operating pressure was 80 psi. They used one roll of 4” x 12’ STOP IT® to fix the leak.

Quote: “ STOP IT® appears to work well in irrigation applications. I’m very pleased with your product, and will continue using it”.
